

Great to see children active, instead of always using electronic devices. But Hey, why can't they keep still long enough to finish a meal, or get dressed?
 If ADHD is not a disease, Why do they need to take medication?
 What is actually out of balance in the body, and is there a simple way Nature can help?

- * My first success stories were with 2 ADHD children - the 1st one was a 12 year old boy who had been suspended from school one day - because he was too disruptive.
- * His brain scan brainwave summary would have looked similar to this one on the left - he was quite bright shown by plenty of Beta and even high Beta cognitive frequency. He had lots of Alpha (blue), which indicates he was very relaxed - being agitated doesn't necessarily mean he is stressed.
- * What is specifically related to ADHD is that he had a huge amplitude of the 2 Lower frequencies - Theta and Delta - most people only have these 2 frequencies during deep sleep, when Hormones and Rejuvenation take place.
- * Theta and Delta are related to the Limbic area, and Emotions, creativity and lateral thinking - and this boy has way too much of them - compared to Beta.

- * This imbalance of High and Low brainwave frequencies - often presents as 'naughty' or hyperactive behaviour.
- * There is one effective strategy to correct this imbalance, but contrary to common belief, it is not sedation - because there is already an excess of deep relaxation frequencies of Delta and Theta.
- * The solution is to apply a "balanced" brainwave pattern - which will help create a 'balanced' outcome.
- * I have successfully tried 2 methods. One is to listen to a 1 hour CD that has 5 layers of electronic sound, one from each frequency range. This produces a balanced brainwave pattern - but downside is you have to be listening to this special CD to get the benefit.
- * The best option of course, is wearing a Pyramid Pendant and getting a continuous 'balanced' brainwave pattern, as shown on the right side diagnostic above.
- * The second result was with a 12 year old boy who was the son of one of the ladies who used to help me with my Sound Cd seminars. He was a great lad, but just couldn't stay still long enough to complete any task, both at home and at school. His mother was astounded at how all this changed overnight - he was back to a normal boy. She couldn't praise the benefits of the Sound CD enough. Her son was one of the last before I started using PYRAMID ENERGY from a Pendant - to achieve a 'balanced' brainwave state.
