

Dxlyseia is ccratzireeahd by dilciffuy wih larinneg to raed fulently and with acrtacue cosomeernpihn dtipese nrmoal ieicntglelne. This ilecnuds dflificuty with pnooclighoal awnsnaeres, poonlgaicohl dncoeidg, pcmrosesig seepd, oiroarphtghc coidng, auidroty short-trem momrey, lnaguage slliks/vebral cshproomineen, and/or riapd ninmag.

**Yes, i had to pause and figure it out too - but that's what happens everytime, IF you are DYSLEXIC.**

**Doesn't mean you are not intelligent, just slows you down in processing what you are reading. It shows up as a Brainwave imbalance - that can be re-balanced.**

- \* My first clinical experience was with a lady who had a home office for her recruitment business, and her son who was in his 2nd to last year at high school. He was about to give up school, because the difficulty of reading his books to do assignments was getting too stressful.
- \* The Brainwave re balancing strategy worked immediately for both of them - the lady could do her do her office work now in a quarter of the time. Her son started a couple of hours homework for the first time, without the stress of processing what he was reading.
- \* Here is a SUMMARY of BRAINWAVE PATTERNS and HOW IT WORKS:

If you are in perfect physical health, and balanced mental health.

If you may have some symptoms of DYSLEXIA, with perhaps mild difficulty in reading and processing data.

Have Profound symptoms of DYSLEXIA, such as having to read over and over to make sense, or every time you read, get sick in stomach or have a headache.

**PEAK PERFORMANCE** state, when wearing a Pyramid Pendant.

1. For a balanced Mental State - we need the High Beta for mental processing and the Low Delta and Theta Brainwaves for intuition, creativity and lateral thinking.

2. As well as this, normally there is also plenty of ALPHA brainwaves in between - that communicates and facilitates the High number crunching frequencies with the Low understanding frequencies.
3. What is common with DYSLEXIC people - is that this ALPHA frequency seems very small in Amplitude - as shown in the middle 2 diagnostics.
4. That is probably the reason for difficulty in processing and understanding data quickly. Such a simple Brainwave imbalance - nothing else. Could have been caused by a TOXIN entering the Brain and disturbing Hypothalamus Master Gland function.
5. SOLUTION - is to absorb a BALANCED Brainwave pattern from a PYRAMID PENDANT.

- \* DYSLEXIA is more common than people think, with many not yet diagnosed.
- \* It is not a disease or needing medication - but may still be a low order symptom of neural toxicity in the brain.
- \* These days, being exposed to many Toxins, including Synthetic Chemicals in food such as preservatives and artificial sweeteners - overburden the Brain's own Glial type Immune cells. Inflammation can develop, and Hypothalamus function can be affected. It may develop slowly over years, but initial disturbance may be enough to unbalance brainwaves.
- \* I once read an autobiography by Richard Branson, and how he started in business. He didn't mention that he had DYSLEXIA - but read about that in another report. He was so distressed at his reading difficulty, that he used to pay people to read business contracts for him - and then use his gut feeling to make decisions.
- \* We are living in an age of high technology - but also high toxicity. Our bodies are very sensitive to both a billionth of a drop of virus - and equally responds to a healing energy from Nature - PYRAMID ENERGY.
