

HYPOTHALAMUS Master Gland is the Computer chip.....
of the Brain, just like the chip in your computer.
If a bug gets into the chip of your computer, it will
stop working properly.

If a TOXIN disturbs our HYPOTHALAMUS - Disease
conditions can develop, diabetes, arthritis, dementia, if our HYPOTHALAMUS
isn't able to PREVENT disease- causing INFLAMMATIONS.

**You can have ongoing PAIN for the rest of your life - or PREVENT that
happening - and live PAIN FREE - by Rejuvenating your HYPOTHALAMUS.**

- * All organs in our body are vital, especially the Heart - amazingly, it is the only organ that never gets cancer.
- * If the HYPOTHALAMUS isn't functioning properly - because some TOXIN has disturbed it - then disease - causing INFLAMMATIONS can develop - even in the Heart and inside artery walls.
- * From that point of view, it is really this almond size organ, the HYPOTHALAMUS - that is the most vital organ in the body - because it controls the whole health of our body.
- * The Hypothalamus receives electrical messages from the Central Nervous System - telling it where in the body there is a problem needing fixing, such as an Inflammation - and then sends chemical instructions to other Master Glands and organs - telling them what special cells to produce, such as Hormones or Immune cells - to fix the problem.
- * The difficulty is that the Hypothalamus is inside the Brain - so it is not somewhere to get to easily, without a major operation to have a look to see if it is Inflamed.
- * While more disease conditions are now being accepted as caused by Hypothalamus Dysfunction, the focus of treatment is still on the symptoms e.g. Kidney Inflammation, anti inflammatory medication.
- * The TOXIN causing the Inflammation would still be travelling around in the blood circulation, and cause more Inflammation e.g. inside artery walls or even in the Master Gland area of the Brain.
- * The Brain's own Glial type Immune Cells would normally keep the Hypothalamus Healthy - but in today's TOXIC environment it gets overburdened with so many possible TOXINS.
- * The Hypothalamus would normally maintain the strength of the Immune System - and Pain conditions such as Arthritis would not occur.
- * Brain scans while wearing a Pyramid Pendant - clearly show Peak connectivity or communication between neurons in the Master Gland area. This means that the Hypothalamus is Rejuvenating.
- * I initially got Rheumatoid Arthritis over 12 years ago, a weird, horrible pain. When I eventually had my Pyramid Pendants - my RA Pain went, and I have not had it since - or any other ongoing Pain.
