

- \* The LIVER CLEANS TOXINS out of our BLOOD.
- \* It performs many other important functions but that is the one that is really important.
- \* We need our BLOOD to carry NUTRIENTS to all cells in our body - but also to be TOXIN free.
- \* There are many special cells that the HYPOTHALAMUS initiates - that keep our LIVER functional.
- \* Fortunately, every cell in our body gets replaced several times in our lifetime, and even if the LIVER is 80% damaged - it will still keep working.
- \* The one organ in the Brain that can keep our LIVER functional - is the HYPOTHALAMUS.
- \* AND - NATURE can help keep the HYPOTHALAMUS functional - when we absorb PYRAMID ENERGY from a Pyramid Pendant.

### PYRAMID PENDANT PROMOTION

**Absorbing Nature's PYRAMID ENERGY - Rejuvenates our MASTER Gland to help Maintain our HEALTH.**
