

CANCER starts as an INFLAMMATION.

- * **INFLAMMATION can be caused by TOXINS, and even chronic STRESS and DEPRESSION.**
- * **These 2 lifestyle factors can be PREVENTED - but we can't Prevent TOXINS in our body.**
- * **The organ that initiates the production of IMMUNE Cells, to PREVENT INFLAMMATION - is the HYPOTHALAMUS Master Gland in the Brain.**
- * **But if TOXINS disrupt its function, then we are rooted, because it may happen before we are aware that INFLAMMATION has already occurred.**
- * **AND Medical treatment is challenging if we don't know which specific TOXIN has caused it. Also, most drugs can't penetrate the Blood Brain Barrier, because their molecules are too large.**
- * **Treating the area of CANCER may help, if discovered early enough - but the TOXIN may be circulating in the blood, and keep creating more CANCER.**
- * **CANCER is not really decreasing, partly because Life Stresses can trigger INFLAMMATION, and the HYPOTHALAMUS can be disrupted by TOXINS at any time.**
- * **TOXINS can appear from 4 sources;**
 1. **From an excess that accumulate in everyone's SMALL INTESTINE, sooner or later.**
 2. **From the billions that are stored in our FAT cells if we are overweight.**
 3. **From Synthetic Chemicals, such as Preservatives and Artificial Sweeteners that are in all the food we buy.**
 4. **From breathing in, from the environment - and enter via the mucosal passage at the top of the nose, that leads directly into the Brain through a gap in the Blood Brain Barrier.**
- * **The fact that CANCER keeps occurring without any warning or symptoms - indicates that it is not going to be PREVENTED.**
- * **I can give one personal experience of using the BRACELET - that it may possibly help - but emphasise that in no way do I suggest - that it is a treatment:**
- * **Not long ago I had a very stressful few months - and saw a couple of moles on my face suddenly appear, and grow in size very quickly. I took this as a sign that I could possibly have CANCER.**
- * **This is what led me to do some quick and intensive research - to see if I could find any natural resources that could eliminate INFLAMMATION. This is when I found the 2 essential oils - that are encoded in the BRACELET.**
- * **I tried dabbing some directly onto the moles, which seemed to help a little. I knew though, that if it was CANCER, that the moles were only an external symptom, and that the CANCER would be circulating in the blood.**
- * **That is why I encoded the oils into the quartz crystal on the BRACELET. The crystal energy magnified the oil properties many hundreds of times, and transmitted them through my body including blood circulation.**
- * **Each day, the moles decreased in size - and after about a week - disappeared completely from my face.**
- * **Whatever the moles were a symptom of - it shows how powerful the BRACELET is in addressing TOXINS and INFLAMMATION.**
- * **Again, I emphasise that the BRACELET is not a treatment for any medical condition - but Nature's gift in helping us stay Healthy.**
